NorthBridge System Integrators

NORTHBRIDGE IN BRIEF

NorthBridge System Integrators is a leading IT solutions provider, driven by a team of experienced professionals with over 18 years of industry expertise. We cater to diverse IT needs for national and international organizations.

Specializing in system integration, we adeptly combine component subsystems to ensure seamless functionality. Our expertise extends to linking various computing systems and software applications, both physically and functionally. Our area of specialization includes Education Technology Integration, Design supply and implementation of Low voltage systems, IT consultation, and Application development among others.

In today's interconnected landscape, system integration plays a pivotal role. We facilitate the integration of disparate systems using diverse techniques, including computer networking, enterprise application integration, business process management, and manual programming, to optimize organizational efficiency.

SERVICES WE PROVIDE

NorthBridge provides many different discrete services, which contribute to the whole system integration process.

1. Project based LV Contractor

We work as contractor for low voltage system including design, supply, and implementation of CCTV, WIFI, PA, FAS for both government and corporate organizations including Universities, hospitals, hotels, corporate buildings etc.

2. Education Technology Integration

NBDST has been exhaustively working in integration of appropriate technology in modernizing education methodology. We have been committed in transforming traditional teaching approaches into dynamic, tech-infused methods. From consultation to implementation, we provide comprehensive solutions to enhance technology systems in educational settings. Whether it is basic training or advanced integration like smart classrooms, we are committed to upgrading educational experiences for all

3. Library Management Specialization

Our team has been actively providing Library Management solution to educational institutes including Tribhuvan Central Library. The solutions we provide ranges from EM gates, RFID gates, LIS software, to integrated LIS solution (including hardware and software).

4. Annual Maintenance Contracts

NBDST provides supplies and support contracts for businesses in Kathmandu and surrounding areas. Designed with the smaller business in mind, we offer predefined and custom annual support agreements that have a number of benefits over our existing services. From just maintaining your computer hardware to providing a complete computer support solution, we will put together a package that will suit your needs and budget.

We provide cost saving Annual Maintenance Contract with fixed annual rates that allow easy budgeting. All required labor is covered to an agreed service level for tasks such as consultancy, configuration of hardware and software, problem solving and networking.

Features & Facilities

- Installation & Configuration of general office equipment
- Priority Service
- Out of Office hours' support
- Telephone & remote support
- On-site Consultation
- Dedicated IT personnel / free training
- Website maintenance
- Software maintenance

5. Application Development

Custom software is a type of software that is developed either for a specific organization or function that differs from or is opposite of other already available software. These are developed for corporates, business houses, and organizations. We at NorthBridge deliver web-based as well as desktop applications built on NET Framework, PHP and JAVA.

6. Consultancy

IT consulting is a field that focuses on advising business houses on how best to use information technology to meet your business objectives. Working with us will assist you in acquiring any kind of IT components and hiring IT related staff.

7. Corporate Trainings

Northbridge also provides various kinds of IT-based trainings such as CCNA, MCSE, Network troubleshooting, User Trainings, etc. We in collaboration with IT College have trainings programs specially designed for corporation to help their daily operations.

8. **Data Digitalization**

Data digitalization is all about developing processes and changing workflows to improve manual system including converting manual data into digital formats. The most vital contribution of data digitization is a perpetual preservation of your important documents. Another benefit is that digitized data can also be stored on any media format such as CDs, tapes or Zip disks.

9. **Network System Design (LV)**

From the simple task of creating a wired / wireless network for your offices, to designing high end Windows / UNIX / LINUX –based server network systems, we ensure that you will get the best & smoothest network solutions as per your requirement.

10. **Office Equipment Sales**

In today's market where there are numerous vendors and products we provide the best IT equipment for your office automation purposes at lowest possible rates. We deal in a variety of products such as computers, printers, servers, routers, toners, etc as well as high-end products like smartboards, Library security gates, servers, switches, IOT products, etc.

11. **Web Development**

We provide you with the latest system in web technology to enhance your business. Web development is a broad term for any activity in developing a web site for the World Wide Web or an internet. This includes e-commerce solutions, business development solutions, web design, web content development, client-side/server-side scripting, and web server configuration. We provide solutions to Joomla, Drupal, Zencart, Magento and many more.

12. **Web Hosting Service**

A web hosting service is a type of Internet hosting service that allows individuals and organizations to make their own website accessible via the World Wide Web. Our web servers, based in Connecticut, U.S.A., guarantee 100% ownership by providing you unrestricted access to your own panel at cheap rates.
